

**EFFICIENT USE OF WATER AND DISCHARGES CONTROL POLICY**

<b>Policy</b>	<b>Executive in charge:</b>	<b>Contact Person:</b>
Manufacturing Management	Tissue Manufacturing Director  Personal Care Manufacturing Director	Security and Occupational Health Leader  Corporate Environmental Coordinator  Manufacturing Systems and Tissue Process Manager

**OBJECTIVE:**

It is Policy of Kimberly-Clark de Mexico S.A.B. of C.V. to make efficient use of natural resources and in particular of the water used in its manufacturing operations, as well as to ensure compliance with current legislation on the use of water and the quality of residual discharges, and to protect the existing biodiversity in the sites where the company operates.

**SCOPE:**

This Policy applies to Kimberly-Clark de Mexico and Subsidiaries, hereinafter KCM.

**Is the intention of this Policy:**

- To establish annual objectives and to update medium-term goals to reduce freshwater consumption in Tissue operations and manufacturing per ton produced.
- To have a water management system that allows continuous optimization of its use per ton produced, through improvements to production processes, the use of new technologies for internal treatment, and water recirculation in manufacturing operations.
- To operate efficiently and to implement the most advanced technologies for wastewater treatment, exceeding the quality parameters established in current legislation with respect to water discharged.
- To integrate Biodiversity into KCM'S Environmental Management System, respecting, protecting, and supporting with specific programs the conservation of the existing biodiversity in the sites where the company operates and others that the company considers relevant.
